WHAT WE ARE

Not B2C. Not premium share. Cloud workbench for carriers & MGAs: broker package in → decision + quote worksheet + audit trail out. Licensed underwriter still signs. Bind optional in shadow pilot.

B2B Enterprise SaaS Full-stack

- **Six live lines** — each with correct exposure base (limit vs payroll vs TIV)
- **Fail closed** — no fake CLUE/NCCI; their SERFF book on Desk+; Guidewire bind or refused
- **Pricing** — Pilot \$0 · Desk \$799/mo · Book \$2,490/mo · Enterprise from \$6,500/mo

STATUS QUO COST (WHY THEY BUY)

Typical desk volume

\$14,000
Monthly first-pass labor

HOW ROI IS CALCULATED

Line	Formula
Labor value	min saved ÷ 60 × files/mo × \$175/hr × 12
Software cost	Monthly plan + overage × 12
Net profit	Labor value – software cost
ROI %	Net profit ÷ software cost × 100

PILOT SUCCESS CRITERIA

- p95 first-pass cycle ≤ **15 minutes**
- Override rate < **25%** by day 30
- Missing-doc / conflict catch ≥ **90%**

CUSTOMER ROI — BY QUARTER (YEAR ONE)

Net/mo = (minutes saved × files × \$175/hr) – software bill. **ROI** = net ÷ software cost.
Planning model — replace with pilot KPIs at day 30.
